2012 Fall Products
Tour/Edge

XCG6

Twist to Fit & Dial in the Distance.

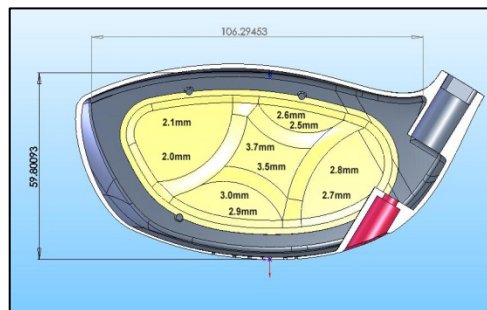

- The new XCG6 driver is our most advanced Exotics driver ever offering everything you've come to expect from an Exotics driver but now with an adjustable hosel for the ultimate in ball flight control.
- Shot Control Technology (SCT) allows you to adjust four face-angle/loft settings to optimize launch characteristics for maximum distance and control.
- Maximum heel toe weighting supplied by four hexahedron weight pads delivering a higher MOI for greater stability which translates into greater distance.
- Advanced multilevel face design maximizes ball speed on all strike points on the face.
- New face design offers multiple levels of variable face thickness that maximize the spring like effect from more points on the face. By thinning and thickening the forged titanium face, the spider web ribbons allow for maximum elongation of the titanium for enhanced feel and rebound.
- Black physical vapor deposition (PVD) finish looks great, feels great and provides enhanced durability.

XCG6

➤ With a simple twist of the SCT wrench you can adjust the face angle, loft, and lie of the XCG6 driver. Here's how:

1. Hit several shots with your XCG6 driver and observe your ball flight
2. If your shots tend to draw or hook (a right to left ball flight for a right handed golfer) select the "O" or open position on the SCT hosel.
3. If your shots tend to fade or slice (a left to right ball flight for a right handed golfer) select the "C" or closed position for more slice correction or the "U" or upright position for less slice correction.
4. If your shots are straight select the "N" or neutral position on the SCT hosel.
5. To make the adjustment, loosen the screw in the heel by inserting the XCG6 wrench into the hosel screw and turn it counter clockwise until the shaft can be completely removed from the head. Then turn the club head to line up the desired face-angle designation on the hosel. See chart on next page for typical ball flight results:

O – Open
C – Closed
N – Neutral
U – Upright

6. Tighten the hosel screw by turning clockwise. Ensure the screw engages the shaft and turn the wrench until you hear the click. Do not over-or-under tighten the hosel screw.

Two exotic shaft choices make the XCG6 the sexiest club in golf. The Matrix Ozik and the Graphite Design Tour AD deliver power and performance. The Matrix Ozik HD features Interply technology that has dynamic effects on ball speed and on sidespin reduction. These results are achieved by combining unique strands of Carbon, Boron, Zylon, and GMAT in a laminate/clocking method. The super-ultra-light, Graphite Design Tour AD generates extra club head speed for longer shots.

XCG6

Legendary Performance.

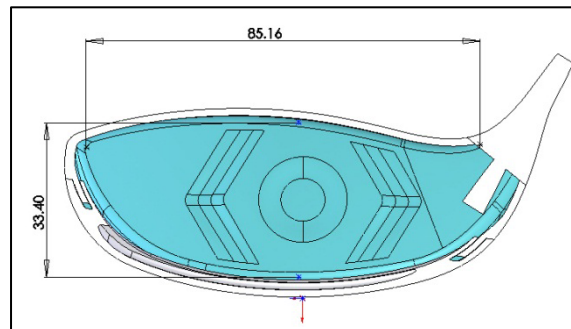

- The XCG6 is the longest Exotics fairway wood yet. It features a 15-3-3-3 beta titanium cup face, a high density steel body and a tungsten sole plate that are combo-brazed for the ultimate in power and forgiveness.
- Larger cup face of ultra premium 15-3-3-3 beta titanium provides to-the-limit COR even on off-center hits.
- The new, high-tech, high-density, steel body is almost as light as titanium allowing more mass to be place in the heel and toe areas of the sole.
- Heavy tungsten sole plate puts 65% of the total club head weight in the heel and toe areas for a higher moment-of-inertia, reduced club head twisting and greater forgiveness.
- Boomerang face technology offers multiple levels of variable face thickness that maximize the spring like effect from more points on the face. By thinning and thickening the face, the v-shaped boomerangs allow for maximum elongation of the titanium for enhanced feel and rebound.

XCG6

The best in distance, control & feel.

- The XCG6 hybrid has a maraging steel cup face and a tungsten steel sole and body with a more “pear-like” shape design than its predecessor.
- Maraging steel is used in the face over stainless steel because it possesses superior strength without losing malleability. As a result, the club face can be made thinner to launch the ball with less spin and at faster ball speeds.
- Extreme heel and toe weighting provides a high moment-of-inertia for reduced club head twisting and greater forgiveness.
- Shallow face height and more cambered sole for ease of hitting from all lies.
- Black physical vapor deposition (PVD) finish looks great, feels great and provides enhanced durability.

XCG6

Advanced sole weighting design.

- The XCG6 iron is our most extreme heel-toe weighted iron yet and our deepest undercut cavity.
- Four tungsten weights sit lower and wider in the heel and toe areas to increase the effective hitting area and lower the center of gravity.
- Ultra-thin face design for a high characteristic of time and maximum distance.
- Each iron is engineered for its specific task including center of gravity location, offset (progressive), face thickness, and top line thickness for a perfect blend of distance and accuracy.
- The deep undercut cavity, the split level sole design, the perimeter weighting and the tungsten sole weights help to lower the center of gravity, optimize the trajectory and enhance the club's moment of inertia.
- Shaft options include X-Lite 90 True Temper, KBS Tour, and Project X steel. In graphite, the standard offering is Matrix Ozik HD and Graphite Design Tour Ad

DG PUTTERS

Milled to Perfection.

- Tour inspired designs feature a high-toe profile which eliminates the tendency to raise the toe at address, causing putts to go left of the hole.
- CNC milled from a solid block of carbon steel.
- X-grip face pattern provides unprecedented feel and control on the green. The responsive, pure feel feedback of the face design translates to incredible accuracy and touch.
- Hand-rolled leading edge ensures that each stroke glides smoothly through the ball, even in the longer grass on the fringe.
- Choose from a silver-bead finish or black PVD.
- True Temper step-less steel shaft that provides a clean appearance at address and a firm, responsive feel.
- Three models to choose from Blade, Anser, and Half Mallet

BAZOOKA **PLATINUM**

Great Value. Great Performance!

- The Bazooka Platinum Iron-Wood takes the super-game-improvement iron category to an entirely new level. Available individually or as a complete iron set, the club's perimeter-weighted, oversized, hollow, hyper-steel head makes it an ideal iron replacement.
- Two heavy tungsten sole weights make the Bazooka Platinum extremely forgiving. The weights place more weight below the ball so even off-center hits fly longer and more accurately.
- Lightweight, super-thin, forged crown and a cast body. The thin crown allows 20 grams of weight to be added to the sole. For enhanced distance, the face is thinned and features three internal reinforcement bars for durability.
- In this year's model, the long irons are more hybrid like and the scoring irons are more iron like. The men's version comes with a metallic silver finish and the women's with a high contrast white finish.

CB5

GO LONG! GO VERY, VERY LONG.

- The new CB5 punches out greater ball speed and less spin than the CB4 thanks to a SP700 beta titanium.
- This no weld-design combo-brazes a beta-titanium cupped face with a heavier hyper steel body. The result, every single gram of excess weight is eliminated from the face and shifted to the rear skirt and sole for a deeper center of gravity.
- The swept wing sole moves weight to the heel and toe for a larger sweet spot.
- The CB5 features the same trampoline face design found in the CB4 that combines multiple levels of face thickness and an inner cone for enhanced elongation of the titanium face and a powerful rebound effect.

XRAIL

The Easiest-To-Hit Fairway Wood In Golf.

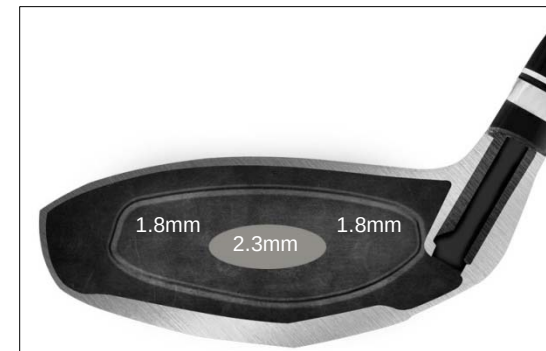

- The next generation Xrail fairway wood expands Exotics superiority with a design that takes playability, versatility and forgiveness to a new level by making fairway wood shots effortless.
- The wider, diamond shaped v-sole squares the clubface at impact.
- 15% more weight in the heel and toe areas than its predecessor, the Xrail produces a higher moment of inertia for enhanced stability on off-center hits.
- Multi-metal construction combining a hyper-steel body with a thinner Carpenter steel face with variable face thickness.
- Utilizes CAD frequency analysis to generates the club head's inner architecture and to enhance performance on the maximum surface area for greater forgiveness, longer shots, and better feel.

CAD Analysis Maximizes Performance

Diamond Rail Sole Lowers the C.G.

Feel & Distance Improved Via VFT

XRAIL

- V-sole design minimizes divots from heavy lies and lowers the Xrail's center of gravity so shots get up and away quickly and easily
- The Graphite Design G-Series shaft features X Directional Technology (XDT) which is the unique application of graphite fiber ply angle alignment throughout the shaft structure to produce measurable performance gains through a more balanced distribution of the graphite fiber angles within the piles of the shaft design, the result is a balanced and versatile shaft.

BackDraft GT+

Great Value. Great Performance.

- Woods & hybrids feature a white finish that increases the contrast between the driver head and the ground helping you focus on the leading edge for accurate ball striking. The more contrast, the easier an object is to see, and the easier it is for you to focus. Available in A, R, and S flex graphite.
- Driver features maximum allowed USGA characteristic of time and is constructed from an aerospace alloy that utilizes titanium and scandium. The material delivers a high strength to weight ratio and has a similar sound and feel as titanium. The driver is available in 9.5° and 10.5°.
- Fairway and hybrids feature a wide sole design for a low center of gravity and a high moment of inertia for easy launch, less spin, and enhanced forgiveness. Constructed from 17-4 stainless steel.
- Irons offer a progressive offset head with a deep undercut cavity that moves weight away from the face for enhanced forgiveness on off-center hits. Stainless steel irons available 2x6 regular flex graphite/steel #3, #4 hybrid, 5-PW irons.
- Woods, hybrids, and combo sets are available individually or in one of two box sets: Men's right hand regular 10.5° driver, 3, 5 fairway woods #3, #4 hybrids in regular flex graphite and 5-PW steel irons and a stand bag. Men's senior set includes 12° driver, 3, 5 woods and #4, #5 hybrid, and 6-SW irons in A flex graphite and a cart bag.
